

January 13, 2022

Dear Munson Parents and Users of Munson Elementary School Water System,

The safety and security of our students and staff is our primary concern. Munson Elementary School is supplied with water via a well and the Chardon Local School District works to follow guidelines for testing and results reporting as required by the Environmental Protection Agency (EPA).

Chardon Local Schools was found in violation for failure to sample drinking water for total Coliforms as required for the month of November. This sample was not collected by the operator of our water system for the month of November. While we have collected the December water sample and it has been returned as "Negative Coliform", we are required by the EPA to inform the users of the water system of the violation. We are implementing steps so this does not happen again.

As always we will continue to monitor and make the necessary corrective actions needed to keep our water system safe for all students and staff. Please reference the attached document for further information.

Sincerely,

Steven M. Kofol

Assistant Superintendent for Business Affairs
